Preparing Renewable Energy for Climate Resilience

---

## Quick Facts

<b>Countries</b>	Bhutan
<b>Financial Institutions</b>	Asian Development Bank (ADB)
<b>Status</b>	Approved
<b>Bank Risk Rating</b>	U
<b>Voting Date</b>	2020-11-18
<b>Borrower</b>	Government of Bhutan
<b>Sectors</b>	Energy
<b>Investment Type(s)</b>	Advisory Services
<b>Investment Amount (USD)</b>	\$ 0.75 million

## **Project Description**

This project will prepare the Bhutan Renewable Energy for Climate Resilience Project with the following outputs: (i) construction of two solar PV power plants located in central-west Bhutan with a total capacity of 48-megawatt peak (MWp), (ii) construction of one wind power plant located in western Bhutan with a total capacity of 23 MW, and (iii) respective transmission lines for grid connection. This will be the first step to diversify the generation portfolio of Bhutan's hydropower dominated energy sector.

In addition, this project will strengthen the EA's institutional capacity on solar and wind power project design, financial evaluation, implementation, operation, renewables grid integration, and environment safeguard monitoring. The proposed project will support an awareness campaign on the benefits of efficient and safe electricity use conducted with project affected people with a special focus on women participation. It will also promote renewable energy by incorporating and implementing a training program into the schools' science, technology, engineering, and mathematics (STEM) curriculum with special attention to training female students. The following areas will be explored during the project preparation: (i) women's employment during project construction and operation, (ii) supporting students with a special focus on females from educational institutions in STEM curriculum by organizing extracurricular learning and/or special lecture in whole project cycle of the proposed project to foster understanding of non-hydro renewables, and (iii) gender inclusive local community participation to foster understanding of the project by organizing study tours to the project sites.

## Contact Information

ADB

Meindl, Christoph (Project Officer)

*Project contacts not available at the time of disclosure.*

## ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

## ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
