Project Description

The technical assistance (TA) will provide capacity building and implementation support to expedite the implementation of ongoing project, Loan 3918-BAN: COVID-19 Response Emergency Assistance Project; develop automated medicines and equipment procurement and logistics management system; establish effective monitoring and evaluation system; and support medium to long term efforts to build health system capacity to respond quickly and flexibly to prevent and contain future emergencies. In addition, the TA will provide additional technical support for the development of future investment projects by ADB to help the government for meeting its long-term needs for strengthening the health systems including communicable disease prevention and control.

The TA will provide consulting and logistic support to the government that is currently overburdened with responding to the ongoing COVID-19 outbreak. The TA will prioritize implementing the project activities and achievement of the project's intended results areas in a smooth and timely manner. The TA will carry out need analysis, design, procure and install a distributed stores automation (DSA) system for central medical stores depot (CMSD), for a robust database platform which will have real-time links to the medical stores at each of the district level hospitals and have inter-operability with country's other health information systems.
