Project Description

According to the bank's documents, "The technical assistance (TA) project will provide support to Indian financial institutions (FIs) for lending to small and medium-sized enterprises (SMEs) for energy efficiency and smart infrastructure initiatives.¹ The TA activities include: (i) identifying attractive energy efficiency lending opportunities for FIs across various industry segments (market study); (ii) identifying technology vendors suitable for partnership with FIs; (iii) designing financing structures to incentivize SMEs, particularly those owned by women, to finance energy efficiency initiatives;² and (iv) sharing knowledge on implementing energy efficiency, smart infrastructure, and strategies for financing emissions reduction in India. The TA will support up to two FIs in designing financing facilities (in discussion with technology vendors) for on-lending to SMEs. Following completion of this TA, the Asian Development Bank (ADB) may consider providing financing to Indian FIs to deploy the facilities designed by this TA project."
