

 Early Warning System

ADB-54377-002

Sustainable and Resilient Urban Development Project

---

## Quick Facts

<b>Countries</b>	Nauru
<b>Financial Institutions</b>	Asian Development Bank (ADB)
<b>Status</b>	Proposed
<b>Bank Risk Rating</b>	B
<b>Borrower</b>	Government of Nauru - Department of Finance and Sustainable Development
<b>Sectors</b>	Water and Sanitation
<b>Investment Type(s)</b>	Grant
<b>Investment Amount (USD)</b>	\$ 38.50 million

## Project Description

According to the Bank's website, the proposed NSRUDP will increase access, quality, and safety of urban services for about 2,180 households in Nauru.

The project will:

- (i) improve resilience of the water supply across Nauru by building a reticulated water supply network connecting about 60% of the population (1,215 households in high density urban areas) and strengthening the quality, safety, and reliability of the non-reticulated water supply system for the low-density areas for the remaining 40% of the population;
- (ii) build a water transfer system from existing desalination plants to the new reticulation network ;
- (iii) develop an assessment, improvement, and maintenance scheme for private household rainwater storage systems throughout Nauru to promote resilience through water source diversification, and prepare a periodic maintenance plan for future;
- (iv) build a new septage treatment plant with possible biosolids reuse;
- (v) develop an on-site sanitation system assessment and maintenance scheme for on-site sanitation systems throughout Nauru and prepare a periodic maintenance plan for future;
- (vi) decommission the existing national sanitation facility; and
- (vii) build a composting and solid waste recycling center to promote resources recovery to support a more circular economy.

Outputs will include: (i) climate resilient, safe, sustainable, and efficient water supply system developed; (ii) climate resilient, safe, sustainable, and efficient septage treatment plant, collection, and transport system developed; (iii) composting and waste recycling systems for circular economy developed; (iv) enabling environment, institutional capacity, resilience, and financial sustainability of utilities strengthened to ensure long-term sustainability and resilience.

## ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

## ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
