Project Description

As stated by the ADB, this knowledge and support technical assistance (TA) aim to accelerate decarbonization by promoting carbon capture, utilization, and storage (CCUS) in emitting sectors of India. The TA will undertake feasibility studies for (i) carbon dioxide (CO₂) capture, transport, and utilization for industrial application; (ii) geological storage of CO₂; and (iii) low-carbon production of hydrogen to decrease carbon emissions from refineries in Northeast India until their phase-out. It will also make recommendations on incentive policies and the regulatory framework for CCUS. The proposed TA is closely aligned with the country partnership strategy of the Asian Development Bank (ADB) for India as well as operational priorities 2 and 3 of ADB's Strategy 2030.
