Islamic Republic of Pakistan: Enabling Asset Leasing as a Financing
Approach for Schools

Quick Facts

| | |
|-------------------------|---|
| Countries | Pakistan |
| Financial Institutions | Asian Development Bank (ADB) |
| Status | Active |
| Bank Risk Rating | U |
| Voting Date | 2021-12-08 |
| Borrower | Islamic Republic of Pakistan |
| Sectors | Education and Health, Technical Cooperation |
| Investment Type(s) | Advisory Services |
| Investment Amount (USD) | \$ 0.20 million |

Project Description

According to ADB documents, the proposed technical assistance will support the preparation of a feasibility report to evaluate various education sector-focused asset leasing models for procuring school equipment, infrastructure-facilities, and services by public and private sector schools in Pakistan. The TA will also develop a program implementation plan and operations model with appropriate private sector participation.

PROJECT RATIONALE AND LINKAGE TO COUNTRY/REGIONAL STRATEGY

1. Pakistan has recorded significant improvements in overall school participation and educational attainment. However, it faces severe challenges in providing high-quality and adequate education to eligible children, with its primary gross enrolment ratio increasing from 49.1% in 1980 to 94.0% in 2019. Schools lack basic infrastructure-facilities and services, including electricity, toilets, and information and communication technology labs for students and teachers, creating an unfavourable learning and teaching environment. Schools also suffer from a high student to teacher ratio (number of students per teacher) and stands at 44 for primary schools across the country (footnote 3). Despite improvements made in existing schools and establishment of new schools, poor overall facilities and lack of basic facilities continue to remain as the primary reason for high student dropouts. Of the total school buildings in Pakistan, 55% have fallen into disrepair and are considered unsafe or of low quality. Only 52% of public schools have boundary walls, electricity, drinking water and toilets, while 11% of public schools have none of these.
2. Experiences, especially in the United Kingdom, have shown that asset leasing as a financing modality for procuring equipment by schools has several advantages. Asset leasing (i) leads to more efficient management of school finances; (ii) increases the affordability of schools in procuring higher standard of equipment with a lower upfront cost; (iii) reduces the burden of asset disposal beyond useful life, allowing for the latest technologies and replacement equipment to be paid for over the period the equipment is used.
3. In Pakistan, leasing is a licensed activity that is performed either by commercial banks or by non-banking finance companies (NBFCs) or Mudarabah. Although the leasing industry in Pakistan has a market value of approximately \$206 million and has diversified to industrial machinery, automobiles, and computer hardware, it is still a relatively nascent industry. It lacks innovative products and is confined mostly to small and medium ticket leasing particularly involving vehicles and machinery. Its challenges include resource mobilization constraints relating mainly to the currently volatile interest rate scenario, squeezing of margins, and non-availability of long-term funds and difficulties in recoveries. The leasing of machinery and other industrial equipment has slowed down due to the COVID-19 induced recession.

IMPACT

Providing fair and equal opportunity to all children to receive a high quality of education.

Investment Description

- Asian Development Bank (ADB)

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
