Project Description

According to the Bank’s website, the knowledge and support technical assistance (TA) will help the Changjiang Water Resources Commission (CWRC) of the Ministry of Water Resources of the People's Republic of China (PRC) develop a comprehensive disaster risk finance framework to support integrated flood risk management for the Yangtze River Basin. The TA responds to the rising risks associated with climate change in the PRC and their potential impact on the government's fiscal sustainability. The TA is aligned with the PRC's goals in its 14th 5-year plan (20212025) to (i) improve the country's emergency management capacity and address major disasters, and (ii) enhance the social and economic resilience of the Yangtze River Basin.
