Project Description

According to the ADB website:

> The knowledge and support technical assistance will deliver a range of knowledge solutions for the 14 Pacific developing member countries of the Asian Development Bank. TA resources will specifically help implement ADB's Pacific Knowledge Plan, described in the Pacific Approach 2021-2025, and will focus on developing knowledge and capacity for a more resilient Pacific. The TA will finance workshops to deepen regional knowledge sharing, capacity development for target sectors and institutions, and knowledge products on key development issues. The TA will facilitate more inclusive and sustainable development in the Pacific DMCs and will increase operational efficiency and the relevance of development partner support in the region. Through it, ADB will provide more timely and tailored knowledge solutions, focusing on high-quality policy advice, capacity development, programs, and technical studies. The TA will identify and address specific knowledge gaps in the Pacific DMCs, support deeper regional collaboration and knowledge sharing, and develop capacity across the public and private sectors.
