

 Early Warning System

ADB-57018-001

Reducing Marine Debris Program, Subprogram 1

Quick Facts

Countries	Indonesia
Financial Institutions	Asian Development Bank (ADB)
Status	Proposed
Bank Risk Rating	C
Borrower	Government of Indonesia - Ministry for Maritime Affairs and Investment
Sectors	Climate and Environment
Investment Type(s)	Loan
Investment Amount (USD)	\$ 1,150.22 million

Project Description

According to the Bank's website, Indonesia is the world's largest archipelago and among the largest contributors of plastic marine debris globally, with 5,000 tonnes of plastic entering Indonesia's ecosystems every day. Plastic pollution damages marine ecosystems, undermines coastal tourism and fishing livelihoods, and introduces microplastics into the food system. More than 60% of plastic waste is either not collected or mishandled with the majority being burnt in the open, this loss of recyclable material to the circular economy, and resulting improper disposal, directly contributes to resulting increases in greenhouse gas emissions (GHGs), and air pollution, and hinders the adaption of ecosystems to climate change. To address this issue, the Government of Indonesia has committed to an ambitious target of handling 70% of plastic marine debris by 2025 in a National Action Plan (NAP) for Handling Marine Debris. The Reducing Marine Debris Program is aligned with this action plan. A programmatic approach that combines policy-based loans, technical assistance (TA), and knowledge support was selected to support the government as it allows complex and ambitious reforms to be addressed comprehensively and enables ADB to support acceleration of the implementation of the NAP.

The program will contribute to the following operational priorities: (i) addressing remaining poverty and reducing inequalities by improving the delivery of public services; (ii) tackling climate change, building climate and disaster resilience and enhancing environmental sustainability by helping reduce carbon emissions; (iii) making cities more livable by improving access to basic services in urban areas. It will contribute to the pathway three of ADB's Country Partnership Strategy for Indonesia 2020-2024 on strengthening resilience.

Early Warning System Project Analysis

The following will be assessed: (i) economic impact, (ii) climate change and Paris Agreement alignment, (iii) gender, (iv) safeguards, and (v) the private sector. Subprogram 1 is expected to be classified effective gender mainstreaming and category C for all safeguards. The social safeguard screening concluded that subprogram 1 will positively impact the environment and communities, including indigenous peoples, and categorized the program as C for the environment, involuntary resettlement, and indigenous peoples.

Investment Description

- Asian Development Bank (ADB)

Sources:

- Ordinary capital resources: US\$ 500.00 million
- KfW Bankengruppe: US\$ 433.48 million
- Agence Francaise de Developpement: US\$ 216.74 million

Contact Information

No contacts available at the time of disclosure.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
