## Project Description

As stated by the ADB, the project consists of a senior secured loan of up to \$12 million in peso equivalent from ADB's ordinary capital resources to finance the development, construction, and operation of a portfolio of photovoltaic power systems on the rooftops of commercial and industrial buildings in the Philippines of up to 70 megawatts (MW).

With ADB's assistance, the project will develop the nascent Philippine rooftop solar market, which has an installed capacity of 191.8 MW that is highly fragmented across more than 40 participants. The project will support a small to medium-sized company with a market niche, which would increase installed capacity by 36% and promote rooftop solar coverage in the urban areas outside Metro Manila in Luzon (Bulacan, Laguna, Pampanga, and Pangasinan); Visayas (Bacolod); and Mindanao (Misamis Oriental and Zamboanga).
