## Project Description

According to bank website, the proposed project aims to improve the learning outcome of science education and the 21st century skills cultivating strong foundations needed for future labor force in this fast-changing and technology-driven societies. The PISA 2022 results revealed Mongolian secondary students' low comprehension in science, mathematics and reading. The learning context during the COVID-19 pandemic, characterized by TV and online-based learning, further weakened student competencies in these subjects in addition to existing challenges in the education sectorsuch as low teaching quality, changing and unclear curricula, and weak alignment with labor market demand skills.
