## Project Description

According to the Bank's website, the Technical Assistance (TA) aims to foster green banking practices in Armenia and Georgia, facilitating economic development and environmental sustainability in the region. The TA's major activities are centered around conducting comprehensive gap assessments for selected financial institutions in the mentioned countries, strategically identifying areas for improvement in green finance practices. Simultaneously, the project prioritizes the enhancement of internal capabilities within these financial institutions through focused capacity development and knowledge-sharing initiatives. The TA is strategically designed to align with overarching goals, placing a specific emphasis on fostering green finance practices and amplifying green lending initiatives. This approach positions financial institutions to assume a proactive role in driving economic growth, promoting environmental sustainability, and achieving the Sustainable Development Goals (SDG) within the region. The TA will actively explore potential market needs for further lending to banks, aiming to enhance their green portfolios. By identifying specific gaps and opportunities in green financing, the TA will pave the way for targeted interventions that address the unique needs of financial institutions in both countries. This strategic exploration is designed to inform future endeavors, potentially leading to additional project opportunities that actively promote green finance practices and foster the expansion of green lending initiatives.
