Developing Climate-Food-Nature Investments in the Pacific

Project Description

According to the Bank's website, climate change and the loss of ecosystem services are increasingly threatening sustainable development of the Pacific small island developing states. The technical assistance (TA) will support climate resilience of developing member countries (DMCs) of the Asian Development Bank (ADB) in the Pacific, through a climate-food-nature nexus approach focusing on improved agriculture and fisheries management, protection of water resources, natural capital, ocean and and coastal resources, and flood control. The TA will serve as an umbrella TA for the engagement of ADB's Agriculture, Food, Nature, and Rural Development (AFNR) sector, will support long term sector development while also cater to immediate country project needs.
