Project Description

DESCRIPTION

The subproject will accelerate digitalization of trade documents to facilitate transactions, and advocate for the use of model rules, principles and standards for digital trade, a governance framework for cross-border data flows, and enablers of cross-border payments.

PROJECT RATIONALE AND LINKAGE TO COUNTRY/REGIONAL STRATEGY

The acceptance of electronic trade documents has yet to be fully realized in most CAREC countries, although many have adopted digital strategies but have not made full use of model rules, principles, and standards for digital trade. Cross-border data flows, which underpin digital trade and other business activities while being a business activity, require a governance framework that takes privacy, interoperability, consumer protection, and cybersecurity into account. Infrastructure gaps exist across the connectivity value chain, i.e., at the first mile for international links, middle-mile for distribution, and last-mile for access. Cross-border payment acceptance is a major challenge, due to varying digital payments policies and payment system incompatibility that limits e-transactions. Hard and soft infrastructure gaps must be addressed through increased knowledge, pilot projects, and enhanced capacities.

IMPACT

Integration of CAREC countries into the global economy enhanced (CAREC Integrated Trade Agenda 2030) and the greening of regional trade and climate solutions promoted (Regional Action on Climate Change: A Vision for the CAREC Program)^a and Baku Declaration on CAREC Partnership for Climate, Innovation, and Trade

Contact Information

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
