Borrower	Government of Georgia
Sectors	Law and Government, Technical Cooperation, Water and Sanitation
Investment Type(s)	Advisory Services
Investment Amount (USD)	\$ 0.40 million
Project Cost (USD)	\$ 0.40 million

Project Description

As stated by the ADB, the TA cluster subproject 5 (Strengthening Project Development of the Water and Urban Development Sectors) will support capacity development, policy advice, project identification, and support of project preparation of 2025 to 2028 pipeline projects. It will directly support the country partnership strategy's objectives to transition to a green and integrated economy, with focus on improving the overall capacity of Georgia's large water state-owned enterprise; and foster a more resilient and inclusive society through investment projects aimed at enhancing the accessibility and liveability of medium and small cities and rural area thus, uplifting these areas' full economic potential. The subproject particularly supports cross-cutting thematic priorities, such as climate change and disaster risk management, and accelerating digital transformation by introducing digital solutions across the water and urban operations.

Target Outputs:

1. Institutional capacity for urban climate resilience and disaster risk management improved. This output includes strategic assessment and knowledge sharing events to identify institutional set-up and innovative and integrated solutions to be financed under a priority investment plan for urban and coastal resilience. It will strengthen capacity of policymakers and facilitate coordination among them for sustainable implementation arrangements of ensuing loans.
2. Strengthened design of urban and water sector programs. This output will finance project origination and due diligence activities to help pivot ADB's urban programs toward more climate action and gender mainstreaming. These activities include, though not limited to, strategic assessments on procurement and safeguards, economic and financial sector assessments and/or analysis, and project concept notes. The output will contribute to readiness of ensuing loans which are innovative in lending modality and technical content.

The TA cluster subproject will have the following outcome: Government capacity and project pipeline for advancing climate and disaster resilience in the water and urban sectors enhanced.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
