### Project Description

As stated by the ADB, the TA cluster subproject will have the following outcome: government knowledge and capacity for enhanced governance and climate-focused public sector management improved.

There are two major outputs expected from the project:

- Output 1: Policy advisory support and capacity building provided to the government for economic growth and diversification. Priority areas for economic growth, export competitiveness and diversification will be identified, with an emphasis on green economic development. Specific attention will be given to integrating gender and social inclusion considerations into green economic policies and programs. This will address the unique challenges and opportunities in Georgia, fostering sustainable development and inclusive growth in the region, and is aligned with ADB's strategy to support Georgia in becoming a regional gateway.
- Output 2: Support to government provided to undertake climate-related public financial management reforms, such as the introduction of natural capital accounting. This output will involve supporting assessments of the current public financial management systems for integrating climate-related considerations. The TA will support the development of natural capital accounting frameworks, which will help the government to better value and manage natural resources. Activities will include identification of gender-responsive pilot projects to demonstrate the application of natural capital accounting to enhance the government's ability to manage public finances in a way that supports climate resilience and sustainable development
