Project Description

According to the Bank's website, ADB is proposing a financing package of up to \$100 million equivalent in CNY to Luli Wood for the construction of an OSB (oriented strand board) factory and a captive biomass power plant and related working capital needs in Jiangxi province, PRC. It includes an ADB OCR loan of up to \$50-75 million equivalent in CNY (6-year tenor with 1-year grace period), and an ADB-mobilized parallel loan of up to \$25-50 million equivalent in CNY, subject to market appetite.

The loans are verified as green loans by a second party opinion (SPO) provider following the eligible categories under the Green Loan Principles. The project is a OneADB collaboration, drawing on the forestry, climate mitigation and circular economy experience from colleagues in AFNR, EARD, and CCSD. The inclusion of ADB's circular economy specialist as a co-team leader and positive engagement with Luli Wood has supported the project's outcomes. AFNR joined the site visit to understand the sustainability of feedstock, manufacturing process and efficiency, and the recyclability of product to maximize circularity.

The project will finance the following investments for Luli Wood: (i) capital expenditures for the land, engineering costs, equipment purchase, and fitting for the construction of an oriented strand board (OSB) factory, including associated facilities (veneer production lines and furniture production lines); (ii) capital expenditures for a captive biomass power plant; and (iii) related working capital needs.
