Project Description

As stated by the ADB, the Energy Efficiency in Public Buildings Results-Based Lending (EEPB-RBL) will support the Government of the Philippines in implementing the Government Energy Management Programme (GEMP) which requires all government buildings to reduce their monthly energy consumption by at least 10%. This requirement is being enforced under the Philippines Energy Efficiency and Conservation Act. The EEPB-RBL aims to deliver approximately 20-30% energy savings in existing public buildings through the procurement and installation of energy efficient lighting, high efficiency air conditioning, distributed solar photovoltaic modules, smart metering and/or electric vehicle charging stations. The project will focus particularly on existing education and health related buildings. The total project cost is \$500 million implemented over a period of five years. The first phase will cover about 100 buildings from 2026-2028 and the second phase will cover about 300 buildings from 2028 to 2031.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
