Bangladesh: Promoting Artificial Intelligence-Enhanced Distribution Grids for Sustainability and

Project Description

As stated by the ADB, the proposed technical assistance (TA) aims to modernize Bangladesh's power distribution infrastructure by leveraging artificial intelligence (AI) technologies to enhance sustainability, operational efficiency, service reliability, and climate resilience. Building on ADB's existing pipeline of power distribution projects, the TA aims to develop AI-based distribution components that could be integrated into the lending plans of these projects. The TA seeks to facilitate the creation of an AI-powered distribution grid, enhancing efficiency and resilience, while advancing the transition toward modern, clean, sustainable, and robust power distribution systems.

ACCESS TO INFORMATION

You can submit an information request for project information at: https://www.adb.org/forms/request-information-form

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: https://www.adb.org/site/disclosure/appeals

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main.
