Project Description

As stated by the ADB, based on the request from the Water Committee, the TA will support the Government of Armenia in assessment of the potential for reusing discharged water from aquaculture for irrigation alongside water accounting and productivity analysis, addressing technical feasibility, governance frameworks, and socio-economic and environmental sustainability. Currently, over 200 aquaculture sites in the valley consume more than 30 million cubic meters (m³) of water annually. The surplus water is being discharged to the Araks River through a network of canals and collectors instead of being recycled or reused. The Ararat Valley presents an opportunity to develop modernized irrigation infrastructure with water treatment powered by solar photovoltaic to divert discharge water from aquaculture into upstream irrigated areas.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
