Investment Amount (USD)	\$ 1.25 million
Project Cost (USD)	\$ 1.25 million

ADB-58545-001

Azerbaijan: Preparing the Azerbaijan Railway Company Decarbonization Project

Project Description

According to the Bank's website, Azerbaijan aims to establish itself as an international logistics hub by 2025, enhancing connectivity via the East-West and North-West Corridors and diversifying trade routes through the Middle Corridor to boost economic resilience and regional integration. With the growing volume of freight transport, the state-owned Azerbaijan Railway Company (ADY) is aligning with international best practices, focusing on decarbonization to support the country's climate targets. ADY is advancing its decarbonization agenda by shifting from diesel to electric traction and increasing the use of renewable electricity, enhancing operational efficiency and reducing costs. This transition will also generate co-benefits like improved air quality, reduced public health costs, and job creation in clean energy.
