Project Description

According to ADB, this subproject initiates overall TA management and lays the groundwork for the TA's four outputs. It begins by analyzing long-term water security and crop production trends in the HKH region's major river basins home to about two billion people where accelerated ice melt and groundwater depletion pose significant risks. This analytical work will highlight future threats, challenges, and opportunities at the national level, guiding efforts to address declining water availability and crop production.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.adb.org/forms/request-information-form>

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://www.adb.org/site/disclosure/appeals>

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>.
