According to the bank's website, "the regional technical assistance (TA) cluster aims to support the transformation of energy systems in selected developing member countries (DMCs) of the Asian Development Bank (ADB), specifically Azerbaijan, Mongolia, the Philippines, and Thailand, with potential expansion to India, Kazakhstan, Kiribati, the Kyrgyz Republic, Papua New Guinea, Tajikistan, and Tuvalu. Located across Asia and the Pacific, the TA will advance reliable, affordable, and low-carbon energy by identifying, preparing, and implementing cross-sectoral, integrated, and smart energy solutions. Major activities include project identification and preparation for both sovereign and nonsovereign initiatives, and knowledge dissemination. The TA will focus on clean and innovative power generation technologies, smart grids and energy management systems, grid integration infrastructure including energy storage, and multisector services such as electric mobility and vehicle-to-grid integration, while also exploring innovative business models and financing mechanisms to enable private sector participation and climate resilience".
