### Project Description

As stated by the ADB, the proposed project will demonstrate the validity of the proposed Coal-to-Solar transition approach to address the air pollution issue in the ger areas in a sustainable manner. The project comprises four outputs, namely the roadmap development output, the investment output, the capacity building output, and the carbon financing design assessment output. The capacity building output will explore an innovative financing scheme through carbon market participation. The investment output will finance the installation of distributed solar PV panels, house-insulation, electricity heating and locally battery assembly facility, which is named as 'Coal to Solar model'. The project plan to be implemented in three subdistricts covering 400 families among which women-headed and vulnerable families are included. The roadmap development output will design the roll out plan of the proposed Coal-to-Solar transition approach to the entire ger areas.

#### ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
