### Project Description

According to the Bank's website, the project consists of a Technical Assistance related to the project 59317-001 (Bangladesh : Cluster Towns Water Supply and Sanitation Project), which aims to improve water, sanitation, and solid waste management services in the project towns, thereby improving public health, livability, and climate resilience. Specifically, the project will: (i) reduce NRW by rebuilding and optimizing distribution networks using a district metered area (DMA) approach; (ii) enhance availability of water; (iii) improve drinking water quality to comply with government standards; (iv) strengthen water service provider entities such that they achieve long-term cost-effective lifecycle-based service provision to set service standards; (v) strengthen municipal capacity for revenue enhancement; (vi) increase resource recovery from fecal and solid waste streams through processing facilities; (vii) increase municipal capacity in incorporating climate resilience in masterplans, programs, projects, and operations; and (viii) promote gender equality by reducing women's unpaid water collection time, expanding access to safe sanitation, and enabling women's participation in water governance. The provision of reliable water supply will stimulate commercial activity in the project towns, stimulating private sector investment and job creation.
