Uzbekistan : Modernization of District Heating Systems in Navoiy,
Tashkent, and Fergana Provinces

Early Warning System

Uzbekistan : Modernization of District Heating Systems in Navoiy, Tashkent, and Fergana Provinces

ADB-59357-001

Quick Facts

| | |
|-------------------------|---|
| Countries | Uzbekistan |
| Specific Location | Navoiy, Tashkent, and Fergana Provinces |
| Financial Institutions | Asian Development Bank (ADB) |
| Status | Proposed |
| Bank Risk Rating | B |
| Borrower | Government of Uzbekistan |
| Sectors | Energy, Infrastructure |
| Investment Type(s) | Loan |
| Investment Amount (USD) | \$ 200.00 million |
| Loan Amount (USD) | \$ 200.00 million |

Project Description

According to the ADB, the project consists of the modernization of District Heating Systems in several cities of Navoiy, Tashkent, and Fergana Regions. The project was formally requested by Government of Uzbekistan.

Uzbekistan's centralized heating system was developed between the 1950s and 1970s. Due to aging infrastructure, it now faces critical challenges including inefficiency, resource waste, and the increasing demand for more reliable and sustainable energy solutions. The country's heavy reliance on low-cost, depleting hydrocarbon resources has made it one of the most energy-intensive in the region, exacerbating environmental degradation and carbon emissions. The 2023 energy crisis, triggered by an extreme winter, underscored the fragility of the current system and the urgent need for resilient, sustainable solutions. In response, the government has launched a transformative modernization program, consolidating fragmented utilities under JSCE "Issiqlikta'minoti" and committing to a five-year roadmap aimed at expanding heating coverage, reducing losses, and integrating cleaner technologies.

This proposed project supports the national reforms by targeting six cities with tailored interventions to modernize heating infrastructure, improve energy efficiency, and reduce environmental impact ultimately enhancing service reliability and climate resilience for urban populations.

The implementing agency will be Issiqlikta'minoti Joint Stock Company.

Early Warning System Project Analysis

The ADB categorized the project E&S risk as follows:

Environment - B;

Involuntary Resettlement - B;

Indigenous Peoples - C.

Investment Description

- Asian Development Bank (ADB)

Private Actors Description

As stated on Alampir.uz, the establishment of “Issiqlikta’mnoti” (Heat Supply) Joint Stock Company (JSC) has been announced. This decision is part of the presidential decree issued on March 11, aimed at radically reforming the heating supply sector and improving the energy efficiency of buildings.

According to the decree, “Issiqlikta’mnoti” JSC will operate under the Ministry of Construction and Housing Utilities, which is tasked with implementing unified state policies in the field of heat supply.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
