Early Warning System

ADB-59413-001

Health Infrastructure Enhancement, Lifesaving Medical Advancements, and Logistics (HILAL) Project

Early Warning System

ADB-59413-001

Health Infrastructure Enhancement, Lifesaving Medical Advancements, and Logistics (HILAL) Project

Quick Facts

Countries	Turkiye
Financial Institutions	Asian Development Bank (ADB)
Status	Proposed
Bank Risk Rating	B
Borrower	Government of Turkiye
Sectors	Education and Health
Investment Type(s)	Loan
Investment Amount (USD)	$ 390.00 million
Project Cost (USD)	$ 390.00 million

Project Description

According to the Bank’s website, the project will take a systematic approach to address these constraints. Hospital and health infrastructure, including primary healthcare facilities, will be comprehensively upgraded in key areas and modernized to meet seismic safety, clinical, and energy and water efficiency standards and requirements for universal accessibility and gender responsiveness. Field assessments following the February 2023 earthquakes found that seismically isolated hospitals remained largely functional, sustaining only minor non-structural impacts and no structural damage. Investments will also support improved resilience to climate impacts such as flooding, strong wind events, and extreme heat.

Upgrading diagnostic and critical-care equipment, along with strengthening supply chain systems, will streamline logistics and expand access to high-quality health care services. Surveillance and early warning systems will be strengthened to improve prediction and mitigation of outbreaks. Pre-hospital emergency responses will be scaled through investment in new emergency health stations and ALS ambulances, ensuring equitable and timely coverage across the country.

In parallel, the MOH's rollout of AI-enabled and e-health platforms will be integrated at the facility level, enhancing prevention, triage, and clinical decision-support. Digital health investments will prioritize full interoperability to enable seamless data exchange across primary, secondary, and tertiary facilities while ensuring compliance with Turkiye's data protection and cybersecurity standards. Special attention will be given to women and vulnerable groups by expanding cancer screening, maternal and newborn services, and cultural & gender-responsive service design. Trained health personnel, supported by modern digital tools, will enhance the system's capacity to respond swiftly to emergencies. Community awareness programs on noncommunicable diseases (NCDs) will be conducted through schools, community centers, digital platforms, and media campaigns to promote prevention and healthy behaviors.

Early Warning System Project Analysis

Environment: B

Involuntary Resettlement: C

Indigenous Peoples: C

Investment Description

- Asian Development Bank (ADB)

The financing amount is $390,000,000, which will be financed on a loan basis by ADB’s ordinary capital resources.

Contact Information

No contacts available at the time of disclosure.

ACCESS TO INFORMATION

You can submit an information request for project information at: https://www.adb.org/forms/request-information-form

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: https://www.adb.org/site/disclosure/appeals

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main.
