Project Description

According to the Bank's website, the purpose of this addendum is to seek approval from the Board of Directors of the African Development Fund (ADF) for a UA 6,871.861.52 grant from the Climate Action Window (CAW)-Adaptation Sub-Window, to complement the financing of the Value Chains Development Project to Support the Agricultural Transformation Programme (PADCV-PTA) in the amount of UA 197.59 million (ADF and TSF financing), approved on 17 July 2024 by the Board of Directors of the African Development Bank Group. The supplementary financing is being sought to meet the need to put in place climate change adaptation measures, in addition to the activities set out in the PADCV-PTA.

These measures make it possible to:

- i) strengthen the resilience of communities to climate risks through human and institutional capacity building;
- ii) implement appropriate activities to sustainably improve food security and contribute to increasing yields and incomes of local communities while increasing the climate change adaptation capacities of the beneficiaries.

The project's development objective is to build the resilience of PADCV-PTA beneficiary communities to climate change impacts.

The specific objectives are:

- i) to broaden access to innovative technologies for climate change adaptation; and
- ii) to build the institutional capacity of meteorological services to improve the national early warning system.

Early Warning System Project Analysis
