Project Description

According to the Bank's website, the proposed operation is an AfDB loan, not exceeding EUR 10 million, to the Government of Cabo Verde, to finance the Emergency Food Production Programme. This is a sector-based budget support operation prepared under the African Emergency Food Production Facility (AEFPF). This operation aims to mitigate external shocks by focusing on making seeds and fertilisers available to farmers. The programme is subdivided into three components: (i) Improve access to certified seeds and advisory support; (ii) Improve farm access to fertilisers; (iii) Improve agriculture sector governance and public policy implementation. It will be implemented from December 2022 to June 2024.

The objective of the Program is to contribute to food sovereignty and nutritional security. Its specific objective is to increase agricultural production and farmer incomes (maize, tubers and roots, beans, vegetables), in the short- and medium-terms, and build farmers' resilience against the drought that has hit the country recurrently.
