## Project Description

According to bank provided information, the overarching development objective of E-PAMP II is to build on and consolidate the digitalisation and e-governance reforms with the aim of enhancing an efficient public service delivery and public administration system while strengthening the business enabling environment and climate resilient digitalisation. This objective is based on the fact that accelerating the digitalisation and e-governance reforms remain key to the government's recovery program and diversification agenda as articulated in its medium-term development program (PEDS II-2022-2026) and consistent with its long-term vision "Ambition 2030". The choice is further informed by the high demand for digitalised services during the pandemic by both citizens and businesses. E-PAMP II will continue to focus one-governance, open governance, transparency, efficient service delivery, modernised public administration and enhanced digital competitiveness.
