Project Description

According to bank provided information, the objective of the PASDP is to improve the country's resilience through institutional capacity building for accountable, transparent and results-oriented debt management. It will improve public debt planning and management capacity by supporting the Public Debt Directorate in the implementation of its missions and by supporting the coordination of stakeholders involved in public debt management in Djibouti.

The Public Debt Sustainability Support Project (PASDP) will contribute to the economic and financial governance programme provided for in Pillar 3 of the National Development Plan (NDP) "DJIBOUTI ICI" (2020 - 2024). In particular, it will support its priority on improving institutional capacity to "strengthen and maintain a sound macroeconomic framework [...] establish and strengthen communication on economic and financial governance". The project is structured around two functional components and a management component as follows: (i) Strengthening core public debt management functions; (ii) Improving the public debt monitoring/evaluation framework and tools; and (iii) Project management. The total cost is 1,000,000 Units of Account, paid 100% by the Bank Group without counterpart funds. PASDP will achieve significant impacts with low transaction costs, while addressing specific fragility drivers identified in the Bank's latest fragility analysis, to contribute to the country's resilience
