Ethiopia - Climate Resilient Urban and Rural Wash Project

AFDB-P-ET-E00-021

Quick Facts

Countries	Ethiopia
Financial Institutions	African Development Bank (AFDB)
Status	Approved
Bank Risk Rating	B
Voting Date	2024-12-12
Borrower	Government of Ethiopia - Ministry of Finance
Sectors	Technical Cooperation, Water and Sanitation
Investment Type(s)	Grant
Investment Amount (USD)	$ 29.24 million

Project Description

According to the Bank’s website, the project is based on the Ethiopian government's new National WASH Implementation Framework (WIF), which aims to contribute to the government's efforts to improve access to sustainable and climate-resilient water, sanitation, and hygiene (WASH) services and support the achievement of the Sustainable Development Goals (SDGs) for water and sanitation in urban and rural areas for Ethiopia by 2030.

The project development objective is to increase access to sustainable drinking water, sanitation and hygiene services and to prepare water supply and sanitation investment projects in selected urban cities and rural settlements in Ethiopia. This will address the acute water scarcity and inadequate sanitation services, and contribute to climate resilience and WASH services in the project areas.
