**Project Description**

The project will cover the capital Addis Ababa & surrounding areas targeting estimated population of 4.5 million inhabitants.

The main socio-economic impact of the proposed project is the upgrade and expansion of the transmission & distribution network in Addis Ababa and its surroundings
to meet growing demand of city.
The project aims to:

- ensuring acceptable quality and reliability of electricity supply for housing development, new commercial and industrial centers, the new light rail system and development of small and medium e businesses.

- improve and strengthen power supply to the surrounding urban areas where power shortages (due to electricity supply network limitation) have affected the provision of vital social services, including health delivery and water supply.

- increase the supply capacity and reduce system power losses thereby enabling the regular supply of electricity to households, enterprises, social services as well as government facilities. This will contribute to improving access rates, economic growth and the living conditions for the population.

ACCOUNTABILITY MECHANISM OF AfDB

The Independent Review Mechanism (IRM), which is administered by the Compliance Review and Mediation Unit (CRMU), is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an African Development Bank (AfDB)-financed project. If you submit a complaint to the IRM, it may assist you by either seeking to address your problems by facilitating a dispute resolution dialogue between you and those implementing the project and/or investigating whether the AfDB complied with its policies to prevent environmental and social harms. You can submit a complaint electronically by emailing crmuinfo@afdb.org, b.kargougou@afdb.org, b.fall@afdb.org, and/or s.toure@afdb.org. You can learn more about the IRM and how to file a complaint at https://www.afdb.org/en/independent-review-mechanism/.
