Bank Risk Rating	B
Voting Date	2024-11-19
Borrower	Government of South Sudan - Ministry of Lands, Housing and Urban Development
Sectors	Water and Sanitation
Investment Type(s)	Grant
Investment Amount (USD)	\$ 10.65 million

Project Description

According to the Bank's website, the project Development Objective is to improve access to urban sanitation services in Juba. The project aims to: i) develop an urban sanitation system in Juba; and ii) strengthen the capacity of sanitation sector institutions.

The project area is Juba city in South Sudan and will benefit about 80% of the households (about 361,000 people) residing within the targeted Blocks (Payams) of Juba, Kator and Munuki, where the population density is highest, with improved access to sanitation services. The three Payams of Juba cover an area of 50km². The proposed improvements in sanitation, and the hygiene and sanitation education, will provide direct benefits to the residents, notably women who bear the brunt of poor health in households. In addition, some 10 sanitation facilities will be provided in selected secondary schools. The project will also provide organic fertilisers for farm use to at least 80 farmers.
