Project Description

According to the Bank's website, the Programme for Integrated Development and Climate Change Adaptation (PIDACC/BN) is a regional initiative aimed at building the climate resilience of vulnerable communities in the Niger Basin countries. It was designed as nine (9) national projects executed by member countries, including Côte d'Ivoire, plus a regional component implemented by the Niger Basin Authority (NBA). The project was approved on 7 November 2018.

The programme's global objective is to build the climate resilience of communities and ecosystems and enhance carbon sequestration capacity. It aims specifically to :

- (i) preserve the Niger Basin ecosystems, especially by reducing the river silting processes;
- (ii) improve the resilience of agro-sylvo-pastoral production systems;
- (iii) enhance the integrated and shared management of natural resources; and
- (iv) increase the forest cover in the former cocoa belt.
