Project Description

According to the bank website, the project's principal goal is to build resilience to food and nutrition in security in the project intervention areas in the Horn of Africa. BREFONS's specific objective is to build resilience to food insecurity and climate change by enabling participating countries to: (i) increase agropastoral productivity and production systems in cross-border areas in the IGAD region (the regional clusters); (ii) make agropastoral value
chains more competitive, thereby ultimately boosting trade and incomes; and (iii) enhance populations' adaptive capacity so that people can better prepare for and manage climate change, climate risks, and climate variations.

BREFONS has four components: (i) strengthening pastoral and agropastoral production systems' resilience to climate change; (ii) supporting the development of agribusiness; (iii) building agropastoral communities' capacity to adapt to climate change; and (iv) coordinating the program and managing knowledge.
