Multinational - Capacity Building for The Operationalization of the
Eastern Africa Power Pool (EAPP) Regional Power Market Trade Project

Quick Facts

Countries	Burundi, Congo, Democratic Republic of, Djibouti, Egypt, Ethiopia, Kenya, Libya, Rwanda, Somalia, South Sudan, Sudan, Tanzania, Uganda
Financial Institutions	African Development Bank (AFDB)
Status	Approved
Bank Risk Rating	U
Voting Date	2019-10-24
Borrower	Eastern Africa Power Pool
Sectors	Energy
Investment Type(s)	Loan
Investment Amount (USD)	\$ 0.97 million

Project Description

According to bank documents, the present intervention concerns the Capacity Building for The Operationalization of the Eastern Africa Power Pool (EAPP) Regional Power Market Trade Project. The project aims to provide support to EAPP to establish the regional power market trade in Eastern Africa, thereby improving access to reliable, clean and affordable electricity in the Region. The key expected output is finalization of shadow market operations, i.e. power market modelling and simulation of the existing bilateral trade, which is a final step in the transition to real market trade. Shadow market operations will provide sound data on which to base market design and identify regulatory bottlenecks to inform responses. The Project will also support the harmonization of regulatory framework for power trading, such as wheeling arrangements to facilitate cross-country power trade. The second output is the full establishment of the EAPP Market Committee (MC), with capacity in regional power market development. The project has two main components, namely: (i) capacity building for market readiness and (ii) project management.

The project's objective is to enhance the capacity for commercial readiness as a last step towards real power market trading.

Investment Description

- African Development Bank (AFDB)

Private Actors Description

As stated on the agency's website, the goal of EAPP is to be a framework for pooling energy resources, promoting power exchanges between utilities in Eastern Africa in order to secure their respective power supply, provide mutual assistance in case of failure in their respective power systems and reduce power supply costs based on an integrated master plan and pre-established rules (Grid code).

There are currently ten (13) member countries of the Eastern Africa Power Pool (EAPP) who have signed the Inter-Governmental MOU (IGMOU). Utilities and national regulators become members of the EAPP once their country signs the IGMOU.

ACCOUNTABILITY MECHANISM OF AfDB

The Independent Review Mechanism (IRM), which is administered by the Compliance Review and Mediation Unit (CRMU), is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an African Development Bank (AfDB)-financed project. If you submit a complaint to the IRM, it may assist you by either seeking to address your problems by facilitating a dispute resolution dialogue between you and those implementing the project and/or investigating whether the AfDB complied with its policies to prevent environmental and social harms. You can submit a complaint electronically by emailing crmuintfo@afdb.org, b.kargougou@afdb.org, b.fall@afdb.org, and/or s.toure@afdb.org. You can learn more about the IRM and how to file a complaint at <https://www.afdb.org/en/independent-review-mechanism/>
