Sri Lanka: Reduction of Landslide Vulnerability by Mitigation Measures (RLVMM) Project

#### **Project Description**

According to bank documents, the project's objective is "to reduce risk and damage from landslides through the implementation of mitigation measures and enhancement of policy and regulation associated with landslide management."

The project has three main components:

- Implementation of mitigation measures, including civil works and associated designs and construction supervision/management;
- Enhancement of policy, standards and institutional capacity;
- Provision of essential facilities and laboratory equipment.

#### **ACCOUNTABILITY MECHANISM OF AIIB**

The AIIB has established the Accountability Mechanism for Project-Affected People (PPM). The PPM provides "an opportunity for an independent and impartial review of submissions from Project-affected people who believe they have been or are likely to be adversely affected by AIIB's failure to implement the ESP in situations when their concerns cannot be addressed satisfactorily through Project level GRMs or AIIB Management processes." Two or more project-affected people can file a complaint. Under the current AIIB policy, when the bank co-finances a project with another development bank, it may apply the other bank's standards. You can refer to the Project Summary Information document to find out which standards apply. You can learn more about the PPM and how to file a complaint at: https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/how-we-assist-you/index.html.

The complaint submission form can be accessed in Arabic, Bahasa Indonesia, Bengali, Chinese, English, Tagalog, Hindi, Nepali, Russian, Turkish, or Urdu. The submission form can be found at: https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/submission/index.html.
