Project Description

According to the Bank's website, the objective of the project is to (i) increase the electricity supply in the Socialist Republic of Viet Nam by supporting a cross-border electricity trade, and (ii) assist Lao PDR's diversification of its energy mix.

The project involves the development, construction, and operation of an approximately 600-megawatt wind generation facility, an associated 500-kilovolt substation, and a 500-kilovolt transmission line in Sekong Province and Attapeu Province in Lao PDR. The generated electricity is expected to be sold to Vietnam Electricity (EVN).

ACCOUNTABILITY MECHANISM OF AIIB

The AIIB has established the Accountability Mechanism for Project-Affected People (PPM). The PPM provides an opportunity for an independent and impartial review of submissions from Project-affected people who believe they have been or are likely to be adversely affected by AIIB's failure to implement the ESP in situations when their concerns cannot be addressed satisfactorily through Project level GRMs or AIIB Management processes. Two or more project-affected people can file a complaint. Under the current AIIB policy, when the bank co-finances a project with another development bank, it may apply the other bank's standards. You can refer to the Project Summary Information document to find out which standards apply. You can learn more about the PPM and how to file a complaint at: <https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/how-we-assist-you/index.html>

The complaint submission form can be accessed in Arabic, Bahasa Indonesia, Bengali, Chinese, English, Tagalog, Hindi, Nepali, Russian, Turkish, or Urdu. The submission form can be found at: <https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/submission/index.html>
