Brazil: BNDES Green and Sustainable Infrastructure On-Lending

Quick Facts

Countries	Brazil
Specific Location	Uninformed
Financial Institutions	Asian Infrastructure Investment Bank (AIIB)
Status	Proposed
Bank Risk Rating	FI
Borrower	Banco Nacional de Desenvolvimento Economico e Social (BNDES), Vivian Machado
Sectors	Energy
Investment Type(s)	Loan
Investment Amount (USD)	\$ 250.00 million
Loan Amount (USD)	\$ 250.00 million
Project Cost (USD)	\$ 250.00 million

Project Description

OBJECTIVE

To increase the capacity of renewable energy generation in Brazil and contribute to climate change mitigation.

DESCRIPTION

The proposed Project is a sovereign backed on-lending facility of up to USD250million to Banco Nacional de Desenvolvimento Economico e Social (BNDES) to support renewable energy subprojects in Brazil. BNDES is Brazil's largest national development bank, whose main purpose is to execute investment policies, and support programs, projects and services that promote economic and social development of the country. The bank plays a critical role by providing long-term financing in key segments of the economy, including sustainable infrastructure, and supports the transition to a low carbon economy.

ENVIRONMENTAL AND SOCIAL INFORMATION

Applicable Policy and Categorization.

AIIB's Environmental and Social Policy (ESP) applies to the Project, which has been assigned as Category FI since it involves the provision of funds through a financial institution (FI). The Environmental and Social Management System (ESMS) for the Project will be aligned with AIIB's Environmental and Social Framework (ESF), Environmental and Social Standards (ESS) and the Environmental and Social Exclusion List (ESEL). As this Project can involve Higher Risk Activities, AIIB will conduct prior review of the first three subprojects with Higher Risk Activities and all Category A subprojects. AIIB will require BNDES to furnish its detailed environmental and social due diligence (ESDD) assessment and instruments for the Bank's prior review and approval for inclusion in the Project. Coal mining, coal transportation, or coal-fired power plants, as well as infrastructure exclusively dedicated to supporting any of these activities, are excluded.

Environmental and Social Instruments

. BNDES has an existing ESMS based on IFC Performance Standards (PSs). AIIB will assess the ESMS with respect to alignment with AIIB's ESP and enhance it where required in areas such as environmental and social (ES) risk rating or categorization, referencing AIIB's ESS and ESP, particularly for subprojects with Higher Risk Activities, comprising all Category A and selected Category B subprojects. BNDES has previous experience with other MDBs such as IDB, World Bank, IFC, and AFD, and relies on internal full-time staff to implement the ESMS, which will be applied to the Project.

Environment and Social Aspects.

AIIB's financing in this Project will be used to promote renewable energy subprojects in Brazil. These subprojects are expected to present significant ES risks and impacts during the construction and operation period; these risks will be mitigated through scoping, screening, categorization, risk assessment, mitigation plans, and project monitoring and supervision. BNDES has commitments to diversity and inclusion, which is part of its environmental, social and governance (ESG) mandate. BNDES' Gender Equity and Diversity Valuing Policy affirms the bank's commitment to contribute to eliminating all forms of inequality and discrimination in BNDES' workplace and in the institutions that participate in its relationship chain. As part of the ESDD, AIIB will assess the processes for gender-related consultations to identify any perceived gender-based violence (GBV) risk or gender inequality in the sub-projects.

Information Disclosure, Stakeholder Engagement, and Grievance Redress Mechanisms (GRM).

BNDES discloses its Social, Environmental, and Climate Responsibility Policy and an overview of the ESMS on its website ([link](#)

). In addition, for Category A subprojects, the required ES information will be disclosed at least sixty (60) calendar days prior to final approval of the activity for inclusion in the Project. For other subprojects involving Higher Risk Activities, ES information on the activities financed during the preceding 12 months will be disclosed annually. BNDES also has an External

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.aiib.org/en/contact/information-request/index.html>.

ACCOUNTABILITY MECHANISM OF AIIB

The AIIB has established the Accountability Mechanism for Project-Affected People (PPM). The PPM provides “an opportunity for an independent and impartial review of submissions from Project-affected people who believe they have been or are likely to be adversely affected by AIIB’s failure to implement the ESP in situations when their concerns cannot be addressed satisfactorily through Project level GRMs or AIIB Management processes.” Two or more project-affected people can file a complaint. Under the current AIIB policy, when the bank co-finances a project with another development bank, it may apply the other bank’s standards. You can refer to the Project Summary Information document to find out which standards apply. You can learn more about the PPM and how to file a complaint at: <https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/how-we-assist-you/index.html>.

The complaint submission form can be accessed in Arabic, Bahasa Indonesia, Bengali, Chinese, English, Tagalog, Hindi, Nepali, Russian, Turkish, or Urdu. The submission form can be found at: <https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/submission/index.html>.
