AIIB-000945

RSAB Harapan Kita Construction and Integration of Three Diamond
Hospitals Project

Quick Facts

Countries	Indonesia
Financial Institutions	Asian Infrastructure Investment Bank (AIIB)
Status	Proposed
Bank Risk Rating	B
Borrower	Government of Indonesia - Ministry of Health
Sectors	Education and Health, Infrastructure
Investment Type(s)	Loan
Investment Amount (USD)	\$ 226.40 million
Project Cost (USD)	\$ 229.80 million

Project Description

According to the Bank's website, the objective of this project is to enhance the availability, accessibility and quality of healthcare services at three national referral hospitals specializing in maternal and child health, cardiovascular diseases, and cancer care.

The Project encompasses the reconstruction of the Rumah Sakit Anak Bunda Harapan Kita (Mother and Child Hospital) (RSAB Harapan Kita), upgrade of medical equipment at Rumah Sakit Jantung dan Pembuluh Darah Harapan Kita (Cardiovascular Hospital) (RSJPD Harapan Kita) and improvements to the connectivity and integration among RSAB Harapan Kita, RSJPD Harapan Kita, and Rumah Sakit Kanker Dharmais (Cancer Hospital) (RSKD). The Project will increase the total bed capacity of RSAB Harapan Kita from 271 to 550 beds, provide specialized medical equipment and integrate (physically, digitally and operationally) the three hospitals into an integrated healthcare complex to enhance service coordination and overall patient care. A central feature of the Project is the introduction of digital infrastructure, which will support digitalization of hospital operations and enable the adoption of cutting-edge medical technologies, such as telemedicine. The upgraded medical equipment and service integration will allow the hospitals to adapt to shifting demographics and emerging disease patterns, including aging populations, non-communicable diseases (NCDs), and climate-sensitive health conditions as tertiary care and national level referral hospitals. The construction and infrastructure upgrades will follow a green healthcare model incorporating climate mitigation and adaptation measures while prioritizing energy efficiency. Further, the structural design will incorporate measures reducing the risk of future earthquake damages to save lives and ensure their continued operation.

Early Warning System Project Analysis

The Project has been assigned a Category B classification due to its environmental and social (ES) risks and impacts, which are site-specific, temporary, reversible, and not unprecedented.

Environment Aspects: The key environmental risks and impacts identified include dust and fugitive emissions, noise and vibration from construction works and waste management challenges from hospital operation. This includes risks to public health and safety while hospital services remain operational during construction and demolition works, and management of hazardous waste during the operation.

Social Aspects: The Project is expected to provide significant social benefits, including enhanced hospital infrastructure and equipment, improved healthcare services, and job creation for local communities during the construction and operational phases. However, the Project may also generate certain social risks and impacts including economic displacement, which will be addressed through specific mitigation measures proposed by the ESMP/ARAP.

Investment Description

- Asian Infrastructure Investment Bank (AIIB)

The total estimated project cost is USD229.8 million of which AIIB loan will fund up to USD226.4 million.

ACCESS TO INFORMATION

You can submit an information request for project information at: <https://www.aiib.org/en/contact/information-request/index.html>

ACCOUNTABILITY MECHANISM OF AIIB

The AIIB has established the Accountability Mechanism for Project-Affected People (PPM). The PPM provides an opportunity for an independent and impartial review of submissions from Project-affected people who believe they have been or are likely to be adversely affected by AIIB's failure to implement the ESP in situations when their concerns cannot be addressed satisfactorily through Project level GRMs or AIIB Management processes. Two or more project-affected people can file a complaint. Under the current AIIB policy, when the bank co-finances a project with another development bank, it may apply the other bank's standards. You can refer to the Project Summary Information document to find out which standards apply. You can learn more about the PPM and how to file a complaint at: <https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/how-we-assist-you/index.html>

The complaint submission form can be accessed in Arabic, Bahasa Indonesia, Bengali, Chinese, English, Tagalog, Hindi, Nepali, Russian, Turkish, or Urdu. The submission form can be found at: <https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/submission/index.html>
