Cambodia: Rural Infrastructure and Sustainable Investment for Growth (RISING) Project

Project Description

According to bank's website, the proposed project aims to improve connectivity within and between rural communities across seven targeted provinces by enhancing rural infrastructure and strengthening their resilience.

To meet the project objective, the Project will focus on upgrading and climate-proofing rural infrastructure, which includes 477 kilometers (km) of rural roads, irrigation systems (serving high value crops covering an area of 10,000 hectares (ha)), and community facilities, to enhance connectivity and access to both markets and public services. It will support smallholder farmers, particularly women, through improved access to agricultural inputs, technology, and extension services including the promotion of climate-smart and nature-positive farming practices. The proposed Project is one of the priority projects in the Cambodia and AIIB Country Cooperation Framework (CCF) (2026-2028).

ACCOUNTABILITY MECHANISM OF AIIB

The AIIB has established the Accountability Mechanism for Project-Affected People (PPM). Under the current AIIB policy, when the bank co-finances a project with another development bank, it may apply the other bank's standards. You can refer to the Project Summary Information document to find out which standards apply.
