Project Description

According to the CDB, the project will enhance the resilience to coastal and riverine hazards and the effects of climate change through strengthened sea and river defence systems in Guyana.

The Project Summary states:

The outcome of the project will be enhanced resilience to coastal and riverine hazards and the effects of climate change (CC) through strengthened sea and river defence systems. The proposed project includes the following components:

- (a) Flood Protection Infrastructure: Civil works for the reconstruction and improvement of approximately 5.4 kilometres (km) of sea and river defences.
- (b) Capacity Building: Consultancy services for selected capacity building in shoreline change monitoring and analysis.
- (c) Community Awareness and Education Programme (CAEP): Consultancy services for public awareness and education activities.
- (d) Engineering Services: Consultancy services for design and supervision of the civil works.
- (e) Monitoring and Evaluation (M&E): Consultancy services for M&E activities.
- (f) Project Management.
