## **Project Description**

As stated by the CDB, this project will rehabilitate 8.7 km of major road to improve efficiency, resilience, safety and accessibility along the Sir George Walter Highway and Friars Hill Road in Antigua. These roads are used by 75% of the population and serve as primary arteries, linking the capital St. John's, the airport, and many of the island's tourism attractions. This upgrade will provide a major boost to commercial and economic activity on the island. The project will also strengthen the institutional capacity of the Ministry of Works and Housing by upgrading the materials laboratory; training ministerial staff in pavement design, construction, and maintenance; and helping the Ministry to better integrate social and gender issues in infrastructure projects.

---

## Investment Description

- Caribbean Development Bank (CDB)

The Government of Antigua and Barbuda will contribute to the project with USD 11.5 million.

*The data provided in this tab is approximate, due to the inconsistency of the information disclosed by the CDB.*

### Private Actors Description

As stated on the company's website, BHM was founded in 1984 by a group of Bahamian businessmen with deep knowledge and experience in the construction industry and are active members on the company's board of directors. Apart from building BHM into a successful company, our directors have achieved success in sectors such as shipping, mining, real estate, and retail. This combined experience supports the overall growth and development of BHM from year to year.
