## Project Description

OPIC will provide a loan to support KMRI LLC, a U.S. small business, to develop, construct and operate a 5.9 MW run-of-river hydro power plant in western Uganda. Uganda has one of the lowest electrification rates in Africa with only 18% of the population having access to power. The project will support the Government of Uganda's goal to increase electricity access through the construction of renewable energy projects in rural areas.
