## Project Description

According to bank documents, the Fund is expected to have a highly developmental impact in Southeast Asia by making equity investments into quickly growing firms that require capital to scale up technology platforms creating efficient marketplaces that link consumers and suppliers. The Fund Manager will transfer expertise to the Fund portfolio companies to support these companies reaching sustainable profitability. Southeast Asia's private equity and late stage venture capital fundraising is low relative to the region's economic importance, an importance signaled by the region's share of emerging market GDP.

The capitalization of a fund is screened as a Category D activity for the purposes of environmental and social assessment.
