Project Description

According to DFC, the Fund is expected to have a highly developmental impact through its deployment of up-to \$100 million of capital into 20 to 25 equity investments in small- and medium-sized enterprises operating in the digital health, fin-tech, and digital micro-insurance markets located in Southeast and South Asia.

The COVID-19 pandemic has ended a decade-long economic expansion by plunging the Southeast Asian and South Asian regional economies into recessions. The Fund will make investments in SMEs, which support social infrastructure providing critical services and goods in the healthcare, insurance, and financial inclusion sectors. In the regions of the Fund's focus, there are an estimated 650 million people unbanked and healthcare and insurance coverage are below global averages. In addition, the collective SME finance gap for the regions stand at over \$560 billion.

The Project has been reviewed against DFC's 2020 Environmental and Social Policy Procedures ("ESPP") and has been determined to be categorically eligible. Equity investments into funds are screened as a Category D activity for the purposes of environmental and social assessment
