Project Description

According to DFC, the proposed fund is expected to have a highly developmental impact in India by making private equity investments in growing firms that utilize technology to offer either innovative products related to healthcare or loans for microenterprises and SMEs (“MSMEs”). The Fund's strategy includes acquiring a significant minority stake in each of its portfolio companies and adding value through active engagement on strategic and operational affairs over a four-to-six-year investment horizon. Many of the firms targeted for investment utilize technology in areas where it is greatly needed to address shortages of MSME credit and healthcare delivery.

The capitalization of a fund is screened as a Category D activity for the purposes of environmental and social assessment. Based on DFC's due diligence, the Fund's downstream investments are anticipated to pose medium or limited environmental and social risks that are site specific and that can be readily mitigated through the application of sound environmental and social management practices.
