The Project is expected to have a highly developmental impact through the provision of credit to MSMEs amidst challenging economic conditions resulting from the Russian invasion of Ukraine. Technical assistance is also expected to upgrade borrowers' ability to access and manage financing while increasing export potential. The Project is expected to mitigate adverse financial conditions in the private sector, contribute to an inclusive base for the country's economic recovery, and promote firms' competitiveness in the local and global economies.

Early Warning System Project Analysis

DFC loan portfolio guaranties for the expansion of lending to micro, small, and medium enterprises are screened as a Category C for environmental and social assessment. These downstream investments are expected to result in minimal adverse environmental and social impacts. Therefore, all those downstream investments have been pre-screened as Category C and further review and consent is not required for these investments.
