Project Description

According to DFC, the proposed project is expected to have a highly developmental impact in India through support for expansion of two-wheel electric vehicle rentals in the country, including for urban goods transport. Reports show India hosting some of the worst automobile traffic in the world, with new vehicles introduced faster yet than roadway capacity due in part to fast income gains. The Project is expected to increase the potential flow of goods in urban settings in India while mitigating congestion and associated air pollution impacts. The Project Company also effectively crowds in private capital to an alternative transport market segment in India and works directly with stakeholders, such as municipalities, to facilitate efficient rental transactions. There are also substantial job and local income impacts associated with the Project.

The proceeds of the Loan will be used to finance the purchase of no less than 20,000 DEX electric bikes to be deployed as rentals in India (the "Project")
